FIWAREMarketplace

Discover Your Path to Innovation:

Welcome to FIWARE Marketplace.

FIWARE Marketplace: your hub for ready-to-use smart products and services

FIWARE Marketplace connects you with the finest cutting-edge **open-source products** and services available on the market.

Every product on our platform is FIWARE-based and has undergone a thorough **assessment** by our team of **FIWARE Experts**, ensuring their trustworthiness and reliability.

Our Marketplace is completely **FREE** for all users, enabling customers to browse and connect with providers at no cost. We provide easy access to repeatable solutions that harness the power of **FIWARE technologies** and the extensive FIWARE partner ecosystem.

FIWARE Marketplace offers a **variety** of **products** and **services** across **4 distinct categories**. Our advanced searching and sorting features guarantee that you will find what you are looking for.

Our Marketplace is backed by a dedicated customer service team, ready to assist you with any questions or concerns you may have. On matter where you're located, our marketplace can **connect** you with **customers** and **suppliers** worldwide with just one click. We also offer a mobile-friendly experience.

A shop front with 200+ smart services and products

FIWARE Marketplace is your definitive guide to discover:

Global Market Products:
Explore services and products developed and implemented by internationally recognized companies.

Expert Providers:
Access providers from around the world with business and technical expertise and years of experience in digital and information technology.

Diverse Offerings:
Find a variety of products for every need, from platforms for Smart Cities to applications for AgriFood and Industry. Each product has links to references and customer feedback, allowing you to make informed evaluations of your chosen product's quality and suitability.

Informed Decision-Making:
Each product has links to references and customer feedback, allowing you to make informed evaluations of your chosen product's quality and suitability.

Enhanced User Experience:
FIWARE Marketplace comes with a better UI/UX design and streamlined product categorization for easy searching and finding.
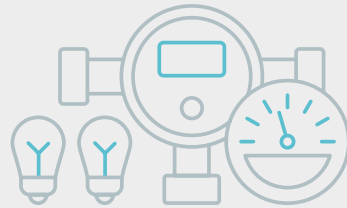

Search, compare, and make your choice

FIWARE Marketplace offers 4 distinct categories, each with its own unique and exciting features and offerings. Dive into the subsections below to explore the specifics within each category.

Powered By FIWARE

### Integrate your FIWARE-Ready products!

The architecture of any "Powered by FIWARE" solution or platform is centered around managing context data through a Context Broker component, using FIWARE NGSI as the core integration API. These smart solutions and platforms can easily integrate "FIWARE-Ready" solutions following a "system of systems" approach and incorporate "FIWARE-Ready" IoT devices. They can also leverage other open-source components available in the FIWARE Catalogue for rapid development.

FIWARE-Ready

Effortlessly handle context information in your IoT devices!

Solutions or devices implementing the FIWARE NSGI interface, even if they are not "powered by FIWARE," can still provide and consume context information, becoming "FIWARE-Ready." This readiness can be achieved through device software or via intermediate services such as IoT Agents, which translate proprietary formats and transport protocols into NGSI. FIWARE offers open-source libraries for IoT Agent development and a range of common IoT Agents to facilitate seamless translation between different IoT protocols and NGSI.

Cities4Cities

Let smart cities pave the way for your smart transformation!

Cities are actively sharing their established FIWARE-based Smart City platforms, offering ready-to-use solutions to other urban areas and territories. This collaborative approach accelerates smart city initiatives, reduces redundancy, and promotes knowledge exchange among cities facing similar challenges. These platforms, packed with features like data analytics and IoT integration, provide a valuable head start for cities seeking efficient implementation of smart solutions.

Support Services

Empower your organization with expert FIWARE support!

Many organizations specialize in providing technical support for deploying and maintaining FIWARE solutions in real-world scenarios, ensuring the seamless operation of FIWARE-based systems. Additionally, they offer training and coaching services, empowering users to harness the full potential of FIWARE technologies for their specific needs. These combined services not only facilitate successful implementation but also foster ongoing optimization, enabling organizations to achieve robust and efficient solutions in the field.
