SUITING THE FUTURE

OPEN & AGILE SMART CITIES

Hack a City

Open APIs for Open Minds

- **Build your App using Real Time Open Data from Cities during a non-stop hackathon**

- **Tackle Smart Cities Challenges using FIWARE standard Open APIs**

- **Open to coders, hackers, designers and anyone willing to create Smart Applications**

- **Connect Big Data, Smart Brains and Creativity. Meet new people and have a nice time solving problems together!**

- FIWARE standard APIs unleash the potential of Real-time City Open Data enabling the kind of innovative services that will radically improve the daily life of people and businesses.

- Come and enroll in the HackaCity contest that will take place at the FIWARE Summit in Utrecht, May 29-31.

  - Monday 29th from 11:00 am you will learn all what is needed about FIWARE to run the hackathon.

  - Then you will be able to work non-stop until Wednesday 10:00am with the support of FIWARE experts creating the "Powered by FIWARE" app that can make you win the final prize of 2500€!

- Register now! https://www.fiware.org/summit/2017/

- More info at: https://hackacity.eu/

Stay tuned & join the conversation!
