

**Meet
FIWARE at
SCEWC'18**

**13-15 November
Barcelona
Stand C337**

Transforming Cities into Engines of Growth

Making a city truly “smart” means turning your city into a platform of growth for innovation, economic development and well-being. By adopting common standards and information models, cities can achieve this transformation with minimum impact, merging forces to build an ecosystem where they can connect and collaborate.

FIWARE is open source. It helps cities to avoid vendor lock-in and protect their investment. It provides access to context information describing what is going on in the city in right-time and on a large scale.

This data is accessible through a standard open API independently from the source of information.

FIWARE integrates components that enable cities to process, analyze and publish historical and current information in order to achieve a better management of municipal services and bring support to an Economy of Data.

Follow FIWARE at the Smart City Expo World Congress

**13
Nov.**

18:20–19:10 at Digital Transformation Room
Thematic Program

**Internet of Things: How Interconnected
Devices Can Change Life in the City**

Juanjo Hierro (CTO, FIWARE Foundation)

**14
Nov.**

10:45–11:45 at Auditorium
Plenary Session

**The City We Want: Resource-Efficient,
Resilient and Sustainable**

Ulrich Ahle (CEO, FIWARE Foundation)

12:05–12:20 at Digital Transformation Room
Thematic Program

**Data-Driven Cities and Cloud: Making
the Most of Data in a Multi-Cloud World**

Juanjo Hierro (CTO, FIWARE Foundation)
