Joining a Game Changer
Joining FIWARE Foundation
We’re driving the smart digital future

We accelerate the emergence of innovative marketplaces of smart portable and interoperable solutions, guiding industries, governments, universities, and civil society to develop their smart vision.

We are a growing global community with a common effort of achieving a solid headway towards making FIWARE open source technology the best instrument for companies to reach their full potential and scale their activities to enter new markets and grow their businesses.
FIWARE Foundation

FIWARE Foundation is a non-profit organization that drives the definition and encourages the adoption of open standards (implemented using Open Source technologies) that ease the development of smart solutions across domains such as Smart Cities, Smart Energy, Smart AgriFood and Smart Industry, based on FIWARE technology. Founded in 2016, the foundation has Atos, Engineering, NEC, Red Hat, Telefónica and Trigyn Technologies among its Platinum members.

8,000+
Developers using FIWARE technologies

500+
Members from 50+ countries

*These projects receive funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No: 780785; 824964; 853864; 821036; 833456; 857065; 731884; 818182; 1926970, 870603, 951975, 952091; 2063524; 2063604; 872613.

**These projects receive funding from the German Federal Ministry for Economic Affairs and Climate Action by resolution of the German Bundestag under grant agreements No: 02L17B071; 01M20007L; BZF335.
FIWARE Foundation is taking the lead in open source collaborative ecosystems setting new standards, on a global scale.

For all of the small players out there, FIWARE gives them guidance around how to open their data and how to leverage applications because I’m not going to build a personalised application for 15k users just in one city but if the data model is aligned, then it is extremely easy to use this at scale.

CHRISTIAN UMBACH
Co-Founder and CEO of Xapix

We are located on an island and FIWARE is the perfect vehicle to connect our Startups with international markets as they will be able to sell their products at that level.

JOSE MANUEL CABELLO
Senior International Project Manager of Innovalia (FIMAC iHub)

We joined FIWARE Foundation because we see the great potential and opportunity that FIWARE can provide us to solve the challenges that we currently have with AgriFood here in Canada.

DR. KAREN HAND
Precision Strategic Solutions, Ontario
The province of Utrecht is one of the supporters of FIWARE in the Netherlands. The province does this because it truly believes in the FIWARE values: independent and democratic IoT and its product; democratic smart cities. The province finds it important that these values are respected in its tenders and because of that, the province works regularly with FIWARE components. A top example of one of these projects is the Sniffer Bike: created in conjunction with citizens (and for citizens) to enhance their lives, Sniffer Bike was made possible through FIWARE technology.

STEPHEN VAN AKEN  
Province of Utrecht

NIST and FIWARE Foundation have had a long-standing and productive partnership, working towards smart city solutions that are scalable, replicable, and standards-based; enabling communities worldwide to be safe, secure, and more livable and workable.

CHRIS GREER  
Senior Executive for Cyber Physical Systems, NIST Engineering Laboratory

FIWARE Foundation is a powerful digital transformation platform for cities and regions. It provides much needed standardization for cities with well proven APIs, used within multitudes of territories to deliver Smart City services. This well seasoned platform enables any city or region to get going quickly and deliver trusted Smart City services. Furthermore, the global reach of the FIWARE ecosystem cross-pollinates experience and partners, bringing international value to cities using FIWARE.

MATTHEW BAILEY  
President, Powering IoT LLC, Global Smart Cities Leader
An open and independent organization

By joining FIWARE Foundation you will be part of a collective movement aiming at creating an open, global, sustainable, standards-based, innovation-driven ecosystem for smart solutions in multiple sectors.

The FIWARE Foundation is open: anybody can join contributing to FIWARE activities and rising through the ranks, based on merit.
What an Impact

Our members are leading players in connecting the world to the future. A future in which people can meet, work, live in a more enjoyable, resilient and efficient way. An exciting digital future where new business opportunities can flourish.

The use of FIWARE open source technology and key standards has brought forward multiple awesome solutions and appealing Impact Stories worldwide.

For more Impact Stories, visit: fiware.org/about-us/impact-stories/
Global partnerships, collaborations...

The European Commission has selected the FIWARE Context Broker technology as a building block for the creation of cross-border digital service infrastructures.

The FiWARE Community is bringing contributions to the IDS-RAM definition regarding how data sovereignty or data brokering and monetization can be effectively materialized.

The FiWARE Community actively leads the work at the Context Information Management (CIM) ISG, where the NGSI-LD API specifications were defined and are now maintained.

A non-profit organization delivering the world’s first scalable, fee-less and decentralized distributed ledger technology. Under the agreement, IOTA’s Tangle technology will serve as an immutable, trusted audit trail for relevant context data transactions in “Powered by FIWARE” architectures.

A forum to design a new society by combining manufacturing and information technologies, IVI has been working with FIWARE to create and develop IIoT, promoting the digital economy by preventing fragmentation and harmonizing aspects related to IIoT.

The FIWARE Community is bringing contributions to the IDS-RAM definition regarding how data sovereignty or data brokering and monetization can be effectively materialized.

TM Forum and FIWARE Foundation launched the “Front-runner Smart Cities Program” aimed at defining a Common Reference Architecture and Data Models for Smart Cities, with the active involvement of cities worldwide. TM Forum’s Smart City Component suite uses FIWARE technologies.

Digital Arabia Network (DAN) is a network of the digital community in the MENA Region, connecting over 1600 digital actors. With a focus on Smart Cities it aims to create synergies between all actors. Together, DAN and FIWARE Foundation will promote smart sustainable cities and digital solutions in the MENA Region.
Joining FIWARE Foundation

The Fast RTPS technology, integrated as a Generic Enabler of FIWARE has been adopted as the default communication middleware in ROS2.

FIWARE brings relevant base-lines for the Minimal Interoperability Mechanism (MIMs) defined by OASC, in order to support a Digital Single Market for Smart Cities.

After a scan of dozen digital platforms, FIWARE technologies were selected to work with the World Bank team for a knowledge project to support Govt. of India’s 100 Smart Cities Mission.

The Authority in Digital Twin, the organisation coalesces industry, government, and academia to drive consistency in vocabulary, architecture, security, and interoperability of digital twin technology. It advances the use of digital twin technology in many industries, from aerospace to natural resources. FIWARE joined the consortium in 2020.

WeGo is an international organization comprised of city and local governments, smart tech solution providers, national, and regional institutions, wanting to transform cities into smart sustainable cities. Committed to the development, standardization, and promotion of FIWARE technologies in East Asia, it pushes for open standards and an open service platform.

The National Institute of Standards and Technology and FIWARE Foundation have partnered up in the definition of “Pivotal Points of Interoperability”, aiming at creating smart city solutions that are scalable, replicable, and standards-based.

GSMA
FIWARE Foundation participates in the GSMA IoT Big Data Ecosystem project, working on the harmonization of APIs and data models for fueling IoT and Big Data ecosystems.

ROS
The Fast RTPS technology, integrated as a Generic Enabler of FIWARE has been adopted as the default communication middleware in ROS2.

NIST
The National Institute of Standards and Technology and FIWARE Foundation have partnered up in the definition of “Pivotal Points of Interoperability”, aiming at creating smart city solutions that are scalable, replicable, and standards-based.
Standardization: some highlights from our work with our partners

- In 2016, the European Commission published the Rolling Plan for ICT Standardisation in which ETSI was requested to create an ISG (Industry Specification Group), aimed at the definition of a standard Context Information Management (CIM) API with FIWARE NGSI as a candidate. In the beginning of 2017, ETSI created the CIM ISG which was successfully brought to market with the so called ETSI NGSI-LD API specifications in January 2019.

- Together with its members, FIWARE Foundation is actively participating in standardization activities within ETSI (NGSI-LD API specifications), W3C (Web of Things), GSMA (IoT Big Data Ecosystem project) and TM Forum (Front-runner Smart Cities program).

- In 2018, the FIWARE Context Broker was selected as the new Connecting Europe Facility (CEF) Building Block, under the umbrella of Horizon2020, to help build the next generation of European digital public services.

- FIWARE Foundation and its members are actively contributing to the development of the International Data Spaces Association Reference Architecture Model (IDS-RAM 3.0).

Businesses and individuals can test FIWARE technologies as well as their applications within the FIWARE Lab Nodes, to exploit published open data.

Join the FIWARE Marketplace
Maximise your business potential. Certify your products and offer your services.
...across the open (source) waters

**Get engaged in driving FIWARE**

Become a member of our Mission Support Committees and Boards where you can bring your experience and knowledge to steer the direction of FIWARE.

**Enjoy discounts and perks from our partners**

Discover the benefits and special discounts that you get by being a member. We have a growing number of exclusive offerings for you.

**Network and Contribute**

FIWARE Global Summits annually gather the FIWARE community and technology users of open source under one roof. Contribute with your expertise.

**Become a FIWARE Evangelist**

Help foster the FIWARE adoption and pave the way for the future’s data-driven economy.

**Become a FIWARE Technical Expert**

Demonstrate your knowledge and offer your services.

**Our digital innovation iHubs (FIWARE iHubs)**

Our digital iHubs can help you build a network of tech-enabling communities and encourage the formation of internet-based businesses also at a local level.
What we offer

As a member, you benefit greatly from the extensive experience and network of our ecosystem made up of small, medium and large global enterprises, startups, innovation clusters, incubators, end-users, universities, ICT infrastructure providers, associations.

Tell me more
Check out what our members say about us

FIWARE Foundation has been doing outstanding work by providing shared resources and putting huge efforts into setting standards like NGSI-2. This allows Atos, as a system integrator and service provider, to offer a standard data platform to cities and create more applications that are easily exchanged with other cities, thus supporting the Single Digital Market in Europe. Moreover, extending the data models is very important, as this allows us to create more cases, using special sensor technologies for cities. By joining the Foundation, you will join a growing group of movers and shakers that are paving the way for new solutions and services, driving innovation at an unmatched speed and scale.

ALBERT SEUBERS
Director Global Strategy IT in Cities, Atos

Telefónica Empresas wants to be a key partner in the digital transformation and FIWARE can help us achieve that goal. FIWARE Foundation stands out as the major driving force in creating an innovation ecosystem that, through an open-source platform, can solve real problems, using data gathered from different sources.

AGUSTÍN CÁRDERNAS FERNÁNDEZ
Director of Business Transformation, Telefónica Empresas
FIWARE Foundation is an instrument to create trust in the evolution of new markets. The more members we are able to attract (in the open source community and at the industry level), the more this credibility can be seen as an added value to our customers when selling products based on FIWARE.

ORAZIO VIELE  
DG of Research & Innovation, Engineering

We have been seeing the growing trend, not only in India, but globally towards the adoption of open source and universally interoperable solutions, based on open and widely accepted standards. FIWARE Foundation has done excellent work in this area. We are looking forward to a long-lasting collaboration to offer versatile, universally interoperable solutions.

Dr. BHASKAR SANYAL  
Executive Director, Trigyn Technologies Schweiz GmbH

NEC will provide advanced social solutions and contribute to the realisation of a super smart society (Society 5.0), for which FIWARE unique capabilities, including cross-industrial use of data and service collaborations, will play a crucial role.

YASUNORI MOCHIZUKI  
NEC Fellow, NEC Corporation
