Joining FIWARE Foundation

FIWARE Foundation is a non-profit organization that drives the definition and encourages the adoption of open standards (implemented using Open Source technologies) that ease the development of smart solutions across domains such as Smart AgriFood, Smart Cities, Smart Energy, Smart Industry and Smart Water based on FIWARE technology.

Founded in 2016, the foundation has Atos, AWS, Engineering, Madinah City, NEC, Red Hat and Telefónica among its Platinum Members.

FIWARE Foundation is your first choice for building the smart digital future.

We are a growing global community with a common effort of achieving a solid headway towards making FIWARE open source technology the best instrument for companies to reach their full potential and scale their activities to enter new markets and grow their businesses.
FIWARE Foundation is growing rapidly

The companies featured here are some examples and do not represent the overall number of FIWARE Foundation members and strategic partners.
FIWARE Foundation is taking the lead in open source collaborative ecosystems setting new standards, on a global scale

Madinah City, Saudi Arabia, has partnered with the FIWARE Foundation to develop and promote Open Standards and Open Source technologies. With its Baseel Smart City Platform powered by FIWARE, we aim to improve the citizens’ quality of life and enrich visitors’ experiences.

ABDULRAHMAN IBRAHIM
Chief Data and Innovation Officer, Development Authority

We greatly appreciate FIWARE as a long-standing partner. Vienna in particular is an example of how FIWARE’s solutions help cities realize their digital visions. We are looking forward to further good cooperation.

BERNHARD SCHMID
Team leader Digital Technologies, Vienna Business Agency

Our involvement in FIWARE iHub is definitely crucial and of great value. FIWARE Innova iHub and its ecosystem have the chance to enhance our innovation activities through collaboration, the participation in projects and also in key events and international fairs, like the Smart City Expo World Congress in Barcelona or the FIWARE Global Summit.

IRENE PROVVIDENZA
Business Developer, FIWARE Innova Hub

FIWARE is more timely than ever! Rule-based data flows, respecting values and protecting intellectual property, allowing monetisation and yet fully maximising the free flow of data is at the core of FIWARE. Technically, this cannot be achieved by close systems, and would be antithetical to a competitive digital economy. Basic data software infrastructures must be open and inclusive, that’s what FIWARE does best — already for more than 10 years.

PETER FATELNIG
Minister-Counsellor for Digital Economy Policy, Delegation of the European Union to Japan

While some may view FIWARE as a necessary standard for IoT interoperability and normalized data sharing, all of which are true and necessary, I view FIWARE as an ecosystem blueprint and marketplace for global exchanges of physical and digital goods and services. It is incredible to imagine developing a service or solution in North America that can be readily consumed in other parts of the world.

JEM PAGÁN
CEO, BluSky Consulting

By integrating FIWARE components with the AWS Smart Territory Framework, we have unlocked the potential of our existing infrastructure and harnessed the full power of sovereign and public Clouds. Through the adoption of this hybrid deployment, we not only comply with data sovereignty but also greatly enhance our ability to drive innovation.

LAURENT CURNIER
Project Manager, Data Platform Government of Monaco

Our involvement in FIWARE iHubs is definitely crucial and of great value. FIWARE Innova iHub and its ecosystem have the chance to enhance our innovation activities through collaboration, the participation in projects and also in key events and international fairs, like the Smart City Expo World Congress in Barcelona or the FIWARE Global Summit.

What an Impact

Our members are leading players in connecting the world to the future.

A future in which people can meet, work, live in a more enjoyable, resilient and efficient way. An exciting digital future where new business opportunities can flourish.

The use of FIWARE open source technology and key standards has brought forward multiple awesome solutions and appealing Impact Stories worldwide.

An open and independent organization

By joining FIWARE Foundation you will be part of a collective movement aiming at creating an open, global, sustainable, standards-based, innovation-driven ecosystem for smart solutions in multiple sectors.

The FIWARE Foundation is open anybody can join contributing to FIWARE activities and rising through the ranks based on merit.

Read our Impact Stories
Global partnerships, collaborations...

The European Commission has selected the FIWARE Context Broker technology as a building block for the creation of cross-border digital service infrastructures.

The FIWARE Community is bringing contributions to the DS-RAM definition regarding how data sovereignty or data brokering and monetization can be effectively materialized.

The FIWARE Community actively leads the work at the Context Information Management (CIM) ISG, where the NGSI-LD API specifications were defined and are now maintained.

A forum to design a new society by combining manufacturing and information technologies, IVI has been working with FIWARE to create and develop IoT projects, promoting the digital economy by preventing fragmentation and harmonizing aspects related to IoT.

The FIWARE Community is bringing contributions to the DS-RAM definition regarding how data sovereignty or data brokering and monetization can be effectively materialized.

A non-profit organization delivering the world’s first scalable, fee-less and decentralized distributed ledger technology. Under the agreement, IOTA’s Tangle technology will serve as an immutable, trusted audit trail for relevant context data transactions in “Powered by FIWARE” architectures.

TM Forum and FIWARE Foundation launched the “Front-runner Smart Cities Program” aimed at defining a Common Reference Architecture and Data Models for Smart Cities, with the active involvement of cities worldwide. TM Forum’s Smart City Component suite uses FIWARE technologies.

FIWARE Foundation participates in the GSMA IoT Big Data Program project, working on the harmonization of APIs and data models for fueling IoT and Big Data ecosystems.

The Fast IDTP technology, integrated as a Generic Enabler of FIWARE has been adopted as the default communication middleware in ROS2.

After a scan of dozen digital platforms, FIWARE technologies were selected to work with the World Bank team for a knowledge project to support Govt. of India’s 100 Smart Cities Mission.

The National Institute of Standards and Technology and FIWARE Foundation have partnered up in the definition of “Pivotal Points of Interoperability”, aiming at creating smart city solutions that are scalable, replicable, and standards-based.

The Authority in Digital Twin, the organisation coalesces industry, government, and academia to drive consistency in vocabulary, architecture, security, and interoperability of digital twin technology. It advances the use of digital twin technology in many industries, from aerospace to natural resources. FIWARE joined the consortium in 2020.

TM Forum and FIWARE Foundation launched the “Front-runner Smart Cities Program” aimed at defining a Common Reference Architecture and Data Models for Smart Cities, with the active involvement of cities worldwide. TM Forum’s Smart City Component suite uses FIWARE technologies.

Training and Mentoring

FIWARE Accelerator supports Incubators, Accelerators, Venture Capital organizations and Digital Innovation Hubs with training, coaching and services, boosting the chance of success in international markets thanks to networking with the global FIWARE Community.

Become part of the service portfolio like our 10+ Accelerator Partners

Agorize
Agorize provides corporate challenges to startups and growth opportunities:• regular updates about startup challenges organized by large companies• free info-sessions on Agorize startup competitions• collaboration on ideas with customers, partners and stakeholders

Bwcon
Bwcon promotes the business development and accelerates innovation processes of companies through:• train-the-trainer and continue education programs• support of startups in the development of business plans and access to investment

ClubGlobals
ClubGLOBALS is not only a business network but also a strategic partner in the tech industry. Its services include:• linking tech leaders with partners• comprehensive event planning to enhance your brand visibility• fundraising and investor connections for startups

Polo Tecnologico
For 30 years, Polo Tecnologico offers services for technology entrepreneurs:• matching investors to startups in the early stage with innovative ideas• mentoring for startups oriented towards manufacturing, Advanced Materials and AI• proposal preparation services• research and development activities

Scientifica
Supporting ideas disseminating a scientific culture, Scientifica offers:• matching investors to startups in the early stage with innovative ideas• mentoring for startups oriented towards manufacturing, Advanced Materials and AI• research and development activities• research and development activities

WOBcom
Being part of Stadtwerke Wolfsburg AG, WOBcom provides:• information on best practices on TCOs and infrastructure services• free coaching programs for young SME startups• product acceleration support of pilot projects, mentoring and coaching activities

Driving Innovation at unparalleled Skills

FundingBox
FundingBox promotes access to funding, community building, and training services:• equity-free funding opportunities• visibility, and discounted sponsored events• mentoring and coaching for early stage startups• business coaching to launch your product into the market

GATEWAY49
GATEWAY49 provides especially to German companies, the following services:• mentoring and coaching for initial idea and prototype• business coaching to launch your product into the market• investor matching for venture capital

Innolift
Innolift offers a wide range of services from consulting to investor matches, specially:• lift-off and community platform services• no user fees for FIWARE members• 50% off courses in 1 year for FIWARE Partners (members of the global FIWARE Community)

ISDI Accelerator
ISDI Accelerator is a global education service in areas such as:• skill upscaling, soft skills, and leadership skills, as well as acceleration and innovation services• 50% off courses in 1 year for FIWARE Partners (members of the global FIWARE Community)

Zabala
Zabala provides services for technical expertise and business opportunities:• discounted price for EIC Accelerator proposal preparation services• on-demand updates for public and SME/Hub funding opportunities and applications• consulting on funding opportunities
FIWARE University Roadshow

FIWARE Foundation is actively integrating universities into the Open Source ecosystem. If you are a university, join this program to empower the next generation of Developers. Plan a free course at your university with FIWARE Foundation.

Equip students with the tools they need to succeed
We offer a special formula for universities: 60 minutes of (remote) training with our best experts on the latest FIWARE technology trends, including:
- Core Context Management and IoT Agents
- Sandbox Environment to learn and test your first Smart Solutions
- Data Models
- Identity Management and access control
- Data Persistence
- Big Data and Machine Learning
- FIWARE Architecture applied to the domains of Smart Cities, Smart Agrifood, Smart Industry, Smart Energy, and Smart Water.

Benefit from a collaborative environment
We offer a real collaborative environment, where international connections, research, and inventiveness come together thanks to the wide range of opportunities, such as:
- Collaboration in projects with universities worldwide.
- Meeting with 550+ members of our global FIWARE Community.
- Promotion by leveraging the global reach of FIWARE digital channels.
- Publication of your Impact Stories to give visibility to your achievements.
- Sharing of insights as a speaker at FIWARE events and trade shows.
- Playing a role at the next FIWARE Global Summit.
- Becoming a FIWARE member to integrate your University into the Open Source ecosystem. Associate Members are eligible to apply to the prestigious Scientific Advisory Board.

FIWARE MarketPlace

Are you looking to build and launch products and services to support your customers’ digital transformation journeys? Submit your offering and fast-track your way through the application process. As a FIWARE member, you enjoy the highest level of visibility, helping you to scale your business and get in touch with new potential partners and customers.

In recent years, FIWARE Marketplace, with its 250+ offerings, has grown into a unique place to connect, grow revenue, and identify customer needs and replicable solutions leveraging FIWARE technologies. FIWARE Marketplace offers FIWARE members an exclusive opportunity to also present their offerings at selected events and trade shows, together with FIWARE. You are the first to get promoted via both classical and digital marketing channels, and gain full access to the entire partner ecosystem. It is our goal to make sure your brand is positioned at the forefront with full product visibility to achieve maximum impact.

Standardization

Some highlights from our work with our partners

- In 2016, the European Commission published the Rolling Plan for ICT Standardisation in which ETSI was requested to create an ISG (Industry Specification Group), aimed at the definition of a standard Context Information Management (CIM) API with FIWARE NGSI as a candidate. In the beginning of 2017, ETSI created the CIM ISG which was successfully brought to market with the so called ETSI NGSI-LD API specifications in January 2019.

- Together with its members, FIWARE Foundation is actively participating in standardization activities within ETSI (NGSI-LD API specifications), W3C (Web of Things), GSMA (IoT Big Data Ecosystem project) and TM Forum (Front-runner Smart Cities program).

- In 2018, the FIWARE Context Broker was selected as the new Connecting Europe Facility (CEF) Building Block, under the umbrella of Horizon2020, to help build the next generation of European digital public services.

- FIWARE Foundation and its members are actively contributing to the development of the International Data Spaces Association Reference Architecture Model (IDS-RAM 3.0).

Check out what our members say about us

**FIWARE Foundation** has been doing outstanding work by providing shared resources and putting huge efforts into setting standards like NCSI-2. This allows Atos, as a system integrator and service provider, to offer a standard data platform to cities and create more applications that are easily exchanged with other cities, thus supporting the Single Digital Market in Europe. Moreover, extending the data models is very important, as this allows us to create more cases, using special sensor technologies for cities. By joining the Foundation, you will join a growing group of movers and shakers that are paving the way for new solutions and services, driving innovation at an unmatched speed and scale.

Albert Seubers
Director, Martel Innovate

**FIWARE Foundation** is an instrument to create trust in the evolution of new markets. The more members we are able to attract (in the open-source community and at the industry level), the more this credibility can be seen as an added value to our customers when selling products based on FIWARE. Moreover, extending the data models is very important, as this allows us to create more cases, using special sensor technologies for cities. By joining the Foundation, you will join a growing group of movers and shakers that are paving the way for new solutions and services, driving innovation at an unmatched speed and scale.

Director, Martel Innovate

**FIWARE Foundation** is an instrument to create trust in the evolution of new markets. The more members we are able to attract (in the open-source community and at the industry level), the more this credibility can be seen as an added value to our customers when selling products based on FIWARE. Moreover, extending the data models is very important, as this allows us to create more cases, using special sensor technologies for cities. By joining the Foundation, you will join a growing group of movers and shakers that are paving the way for new solutions and services, driving innovation at an unmatched speed and scale.

Agustín Cárdenas Fernández
Director of Business Transformation, Telefónica Empresas

**FIWARE Foundation** has been doing outstanding work by providing shared resources and putting huge efforts into setting standards like NCSI-2. This allows Atos, as a system integrator and service provider, to offer a standard data platform to cities and create more applications that are easily exchanged with other cities, thus supporting the Single Digital Market in Europe. Moreover, extending the data models is very important, as this allows us to create more cases, using special sensor technologies for cities. By joining the Foundation, you will join a growing group of movers and shakers that are paving the way for new solutions and services, driving innovation at an unmatched speed and scale.
